

JORGE ANDRES SAKAINO UEHARA

Full Stack Developer & Software Consultant | Go, React, TypeScript

Lima, Peru | +51 945 599 080 | jorgesakaino@gmail.com | linkedin.com/in/jorgesakaino | github.com/sakaino2 | sakadev.oinc-studios.dev

Summary

Full Stack Developer and Technology Consultant with extensive experience building high-performance backend architectures, microservices, and scalable web/mobile solutions. Specialized in ecosystems such as Go, Unity, Java, Astro, React, TypeScript, Flutter, WordPress, and cloud/containerized platforms (Docker, PostgreSQL, Nginx). Proven experience integrating complex inventory systems with real-time data management.

Experience

Full-Stack Software Consultant, Independent – Lima, Peru Sep 2024 – Present

- Design and development of scalable web, mobile, and backend architectures using Go, Gin, PostgreSQL, TypeScript, React/Astro, Dart, and Flutter for local clients.
- Development and integration of reporting modules, HTTP queries, and application health monitoring.
- Building and integrating native and cross-platform mobile applications with Flutter using BLoC state management patterns.
- SQL query optimization and relational data model improvements in PostgreSQL, enhancing API response performance.
- Containerization and continuous deployment of services using Docker and Nginx in cloud environments.
- Implementation of S3-compatible services using MinIO for image storage.

Technical Artist, Zarzilla Games – Lima, Peru Sep 2023 – Mar 2025

- Development of a mobile online game using Cocos Creator, a TypeScript-based game engine.
- Building and integrating new features requested by the Product Design team.
- Integration and optimization of 2D assets and user interfaces to reduce the exported project size.
- Code maintenance and bug fixing identified by the QA team.
- Active collaboration in multidisciplinary teams under agile methodologies (Scrum).

Programming Teacher, Asociación Estadio La Unión – Lima, Peru Jan 2023 – Feb 2023

- Programming classes for children aged 11 to 12 using Scratch.

Graphic Designer, GRV Corporativa S.A.C. – Lima, Peru Sep 2022 – Dec 2022

- Video editing, social media post design, and web design for a real estate company specializing in beachfront condominiums.

Graphic Designer, Wasabi S.A.C. – Lima, Peru Feb 2019 – Jul 2022

- Video editing, social media post design, food photography, and menu editorial design for a restaurant industry company.

Projects

Annual Inventory System

Set 2024 – Present

- Web and mobile platform aimed at State institutions for annual inventory management.
- Built with Go, PostgreSQL, React, Tailwind CSS, and Astro for administration and real-time database synchronization.
- Development of a mobile application using Flutter for field use by inventory takers, with offline mode in case of no internet connection.
- Implementation of report generation functions for analysis and templates to be signed by those responsible for inventoried assets.
- Design of a responsive and modern user interface for visualizing charts representing the current inventory status.

Education

Instituto Toulouse Lautrec, Game Development – Lima, Peru

Mar 2020 – Dec 2022
